 # The Commercial Times.

# COMMERCIAL EPITOME.

FRIDAY NIGHT, June 20, 1873.

Trade has been only moderately active the past week. This is the "dull senson" in most articles of commerce. Breadstuffs and tobacco, among domestic staples, are alone moving in considerable quantities, though the new clap of wool begins to come up in the market. In most descriptions of foreign merchandiza the times are decidelly "slow;" there is little or no speculation, nor any incident to promote it; buyers for consumption take only what is necessary to supply their immediate wants. We find, however, pretty general auticipations of a revival in trade after the 4th of July. It is believed that the stocks of goods in the hands of dealers will then be found unusually low. The statistics of the commerce of this port for the mouth of May show that the imports of merchandize in that month were valued at \$34,479, 370 gold, a falling off, as compared with last May, of more than eight million dollars. The export: of merchandize for the same time were valued at \$23,253,026, currency, against \$15,880,917 last May, an increase of nearly 81 millions, in currency. These statistics illustrate in some degree the "realizing" process which we have heretotore declared to have been going on in mercantile circles; to sell as much and buy as little as possible seems to have been the rule of action.

Freights have been moderately active, and rates by vessels on the berth for Great Britain have advanced, but vessels for charter have not brought any decided advance. Yesterday's business embraced corn to Liverpool by steam at 12@121d., and cheese at 70s; grain to Cork for orders at 9s. 13d. by a vessel in port, and 8e by vessels to arrive about the 1st of September; grain to Penarth Roads at 8s. 9d., and petroleum at 6s. 6d. to British ports and 7s. 6d. to the Baltic. To-day wheat to Liverpool at 12d. by sail, and for the steamers of the 5.h and 12th of July, with grain to Cork

for orders, at 9s. 3d.

Provisions have been firmer for some descriptions of hog products. Pork has been in good demand for export, and sales for future delivery have been at \$16.873@\$17 for new mess on steadiness; there has been a good demand for Western, which has been of acceptable quality, and State Las met with the usual demand from buyers deairing fins qualities. Cheese has further declined, but has been in pretty good demand at the lower figures; the demand has been for the various grades and descriptions, but principally for line, for which shippers have not latterly paid over 13½c, unless for some exceptional lot. Today pork showed a decided decline, new mess selling for July at \$16.50; this was owing to the depression in the markets at the West, after the failure of a large operator there. Lard was weak and sold at \$15.16c, for June, 939 1.16c, for July, and 9½c, for Angust. Bacon was also rather practited August. Bacon was a'so rather unsettled.

The demand for Kentucky tobacco has continued active for xport, mainly on account of Regie contracts, but in part for The sales for the week have been about 800 mids., all except about 100 hhds, for export, the smaller quantity being taken for home consumption. Prices remain unchanged; new croplags, 7@Sc; do. led, 9@14c. Seed leaf shows rather more movement, but no new teature to the market has been made public. Sales have been: Crop of 1870—200 cases sundries, 8 & 9c.; crop of 1-71-30J cases, at 15 362 c; crop of 1872-782 cases Wiscoustn, at 5 364c; 30 do. Illinoiz, at 5 c., and 31 do. Ohio at 6 c. Spinish topacco has been less active, and the sales embrace only

500 bales Havana at 80@95c currency, duty paid.

500 bales H trama at 80@95c currency, duty paid.

Petroleum has materially declined, leading to a large business, mainly for future delivery, some as late as October, closing on the spit at 18\frac{3}{6}18\frac{3}{5}c. in bbls., and 24\frac{1}{1}c. in cases. Naphtha 10\frac{1}{1}@11c. in bbls., and crude 8: in bulk. Naval atores have been moderately active and close ficin. Strained rosin, \$3@\$3.05; and spirits turpentine. 45\frac{1}{3}@16c. Oils have been drooping. Tallow has declined to \$\frac{3}{3}@3\frac{1}{3}c. for prime country and city. Whiskey is also lover, at 92\frac{1}{3}c. Wool of the new clip begins to come forward, and at interior markets 28@42c. paid for prime fleece. New Tex is wool has sold fair y at 25@30c. in this market. Prime California, 21@22: for fall clip, and 27@30c. for spring clip; Cape, 32@35c. Cape, 32 @35c.

Exports of Leading Articles from New York,
The following table, compiled from Custom House returns, shows
the exports of leading articles from the port of New York since January 1, 1873, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show total values, including the value of all other articles besices those mentioned in the table.

COTTON. FRIDAY, P. M., June 20, 1873.

By special telegrams received to night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 20. It appears that the total receipts for the seven days have reached 13,672 bales against 18,245 bales last week, 25,130 bales the previous week and 30,900 bales three weeks since, making the total receipts for the seven days have reached 10,672 and 10,000 bales the previous week and 30,900 bales three weeks since, making the total control of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the first of the f receipts since the first of September, 1872, 3,475,881 cales against 2,682,393 bales for the same period of 1871-72, showing an increase since September 1, 1872, of 793,595 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of the five orevious years are as follows:

| Received this week at- | 1873.        | 1872.        | 1871.        | 1870.        | 1869.     | 1563.     |

There has been very little doing in apot cotton the past week, a There has been very litt's doing in spot cotton the past week, a further nominal advance having brought business almost to a standstill. On Monday low middlings of all growths were advanced to 19½c., and on Tuesday to 20c., where they stood down to the close of business to-day, ordinary remaining at 14½c, all the week. The Liverpool report has been unchanged in price and without special activity. This want of res; onse to the rise here, together with the decline in gold and higher ocean fielghts, have stood in the way of any movement on foreign account, while the demand from spinners has latten off materially, so that the influences supporting prices have been entirely speculative, based upon the reduced stocks, large short sales, and bad accounts of the g owing crop. For future delivery there was a rapid advance until the reduced stocks, large short sales, and bad accounts of the gowing crop. For future delivery there was a rapid advance until Wednesday, when the highest prices in many months, or since alout the first week in March, were taid, viz., for June 204c., for July and August 20 29 32c., for September 194c., for October 18 9-16c., for November 184, and for December 18 13 32c. Towards the close on that day the market developed a very irregular feeling. Thursday something of a "raid" was made on September, and that month was sold down to 19c., being 4c, below the highest point on Wednesday; business for the present crop was at an average decline of \$c\$. To day there was an irregular decline, with little done except for July, August and September, and alter Tchange sales were made at some turther concession, the latest prices being for September 19 15-16c., short notice; for July prices being for September 19 15-16c., short notice; for July 20 5-16c., for August 20 3-16c., and for September 18 13-16c. The total sales of this description for the week are 131,450 bales, including 100 tree on board. For immediate delivery the total sales foot up this week 4,185 bales, including 1,362 for export, 2,61 for consumption, 762 for speculation, and —— in transit. Of the above 150 bales were to arrive. The following are the closing quotations:

WEATHER REPORTS BY TELEGRAPH.—The past week began rainy, but closes in the Gulf and Atlantic States with more settled weather. At New Orleans it has rained every day but one this week, the weather being described as warm, sultry and wet. Very similar weather has prevailed at Mobile; our correspondent at that point reports rain more than hall the week, three days heavy; as the week closes there has been a favorable also are the last days being clear and pleasant; great complaints change, the last days being clear and pleasant; great complaints change, the last days being clear and pleasant; great complaints are received of the wet weather, and much damage is feared, as the weeds and grass grow so fast. At Selma it has also rained more than half the week—heavy showers; the crops are very grassy, but the laborers are working faithfully, and good pregress is being made in clearing the fields of weeds. Our telegram from Montgomery reports three days rain with a favorable change as the week closes. At Macon and Columbus it has also rained more than half the week, with a favorable change at the close, the latter part of the week being clear and pleasant. Our Columbus telegram adds that the reports at that point with regard to the crop are less favorable; last week's telegram from Columbus (which did not reach us through a mistake at the telegraph office until near noon Saturday morning) reported only one day's umbus (which did not reach us through a mistake at the telegraph office until near noon Saturday morning) reported only one day's rain for that week. It has rained three day's at Charleston in the enrly part of the week, the latter part being clear and pleasant; the grass and weeds are getting troublesome. At Memphis it has rained every day during the week, and is now raioing hard; much damage has already been done by the rain, and much more is leared; there is considerable sickness and mor tality on the plantations, said to be cholers. There have also been showers at Nashville, but our correspondent interprets their effect favorably, and adds that the crop is developing promisingly. The thermometer at Mobile has averaged 81, at Selma 84, at Macon 81, Montgomery 85, Columbus 83, and Savannah 87. Macon 81, Montgomery 85, Columbus 83, and Savannah 87.

THE GROWING CROP AS REPORTED BY MAIL.—We have been able to indicate pretty clearly by our weekly telegrams the progress of the growing crop. Since last friday much additional information has reached us from very many sections by mail, and we find in it simply a confirmation of what we had already given. We would, however, state the result up to the present time, not including our telegrams of to-night, as about as follows:

*First*—There was this year an average increase in cotton acreage throughout the South of 11 per cent, and in the Atlantic States a very considerable addition to the amount of fertilizers used, while on the rich lands in the Western and Southwestern States the labor supply was more abundant. With these facts as the basis early estimates of the yield were of course large.

**Second**—The planting season was very cold and backward in most sections, and this, together with the late frosts, which made replanting necessary in a very considerable portion of the South, THE GROWING CROP AS REPORTED BY MAIL.-We have been

replanting necessary in a very considerable portion of the South, resulted in a late start and a very slow growth up to about the first to about the twelfth of Mny, according to the locality. In May there was almost everywhere at least two weeks of good growing weather—not too warm, but sufficiently so to develop the root well, and give the plant a strong, healthy appearance, though still on the average two or n.ore weeks late. Notwithstanding this backwardness, we consider the crop at that period

assvery promising.

Third—Since that time an unusual amount of rain has fallen. As to the South Atlantic and Gulf States the earlier rains were mostly confined to the Guif coast; gradually they extended to the Atlantic coast, and finally have also spread inland. Another series of storms since the last of May have developed in the West, series of storms since the last of May have developed in the West, and prevailed in most of the country tributary to Memphis. This wet weather, however, has not been universal, for the storms have been in the nature of showers, and as they have extended inland have been less general. Consequently we have received many very favorable reports from the section of the Atlantic and Gulf States farthest from the coast. As to the remaining portion of the cotton-growing States there is no doubt of there having been too much rain and that it is very heavily in the grass. But we must not jump to the conclusion that the crop is to be a failure, or even nearly so. It is impossible to measure the extent of the injury until we have dry weather. Certainly some fields will have to be abandoned. Some cotton also will be found to have been robbed of its strength, and therefore to fruit poorly left to make a very satisfactory crop. We understand that the blacks are working well whenever the weather will permit, and left to make a very satisfactory crop. We understand that the blacks are working well whenever the weather will permit, and good progress is being made in clearing the fields, and if dry weather comes speedily we have great confidence in the result, unless some other disaster overtakes the crop.

BOMBAY SHIPMENTS.—According to our cable dispatch received to-day, there have been 24,000 bales shipped from Bombay to Great Britain the past week and 4,000 bales to the continent, while the receipts at Bombay, during the same time have been 19,000 bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, June 19:

|      | -Shipmen |         | eek to- |          | nts since Je    | n.1 to-  | Veek's |
|------|----------|---------|---------|----------|-----------------|----------|--------|
|      | Great    | Con-    |         | Great    | Con-            |          |        |
|      | Britain  | tinent. | Total.  | Britein. | tinent.         | Total. r |        |
| 1973 | . 24,000 | 4.000   | 28.000  | 593,000  | 164.000         | 756,000  | 19,000 |
|      |          |         |         | 529,000  | 227.000         | 756,000  | 00,000 |
| 1372 | . 17,000 |         | 17,000  |          |                 |          |        |
|      | . 51,000 |         | 71.000  | 529,000  | 264.000         | 793,600  | 44.000 |
| 1011 | . 01.000 | ~~~     | * 1,000 | 0 00,000 | - v x j . v v v | 100,000  | ,      |

From the foregoing it would appear that compared with last rom the loregoing it would appear that compared with last year there is au *increase* this year in the week's shipments from Bombay to all of Europe of 11,000 bales, and that the total movement since Jan. 1 shows the shipments compared with the corresponding period of 1872 are precisely the same.

GUNNY BAOS, BAGGINO, &c.—We note an improvement in the demand for gunny cloth during the past week, and more sales have been effected; lots sold yesterday of 450 rolls at 13½c., and also 2,400 rolls, mostly on private terms. Holders are now asking also 2,400 rolls, mostly on private terms. Holders are now asking 13½c. for fall weights; there seems to be also more inquiry for bale cloth; we note sales of 100 bales at 10c., currency, cash. Bags are dull, and we hear of but tew transactions, the latest being 50 bales at 14½c., cash; holders are now asking 14½dl4c. The tone of the market for butts is a trifle firmer, the impression in many quarters being that butts have touched their lowest point; arrivals have been quite free for the past few days, and sales aggregate about 3,000 bales from ship and store at 1½dl 11-16c., cash, and 1½c., time; the market closes to day at 1½c., cash, with no bidders above 1½c. In addition to the above we note sales of 1,600 bales in Boston at 1½c., time.

VISIBLE SUPPLY OF COTTON AS MADE UP BY CABLE AND TELE-GRAPH.—Below we give our table of visible supply, as made up by cable and telegraph to night. The continental stocks and affoat by cable and telegraph to night. The continental stocks and afficial are the figures of last Saturday, but the totals for Great Britain are this week's returns, and consequently brought down to Thursday evening; hence to make the table complete we are compelled to add the item of exports from the United States for the week, including in it only the exports of Friday for Great Britain, but for the Continent the exports of the entire week.

SRIPPINO NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 29,260 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in The CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests of all vessels cleared up to Wednesday night of this week:

# BREADSTUFFS.

FRIDAY P. M., June 20, 1878.

The flour market has experienced a further decided decline during the past week, and the lowest prices in many menths have been reached. Some flour known as "trade brands" hes been closed out to shippers at export prices. Low grades from Spring wheat in irregular parcels on the wharves have suffered most. Neither their quality nor the position of the market would justify sending them to store, and the only alternative was to sell them for what they would bring. On Wednesday the Inside price dropped to \$6, and on Thursday shippers did not generally name more than \$5 75 for them. At the same time we reduce quotations for the better grades 25c, per bbl. Scarcity of freight room and a decline in gold and exchange have contributed to the depression, but a large supply coming forward has been the leading influence, as it discouraged all inclination to hold. Today there was a further decline; good shipping extras sold at \$0, with common at \$5 65@5 75, and prime \$6 25@6 40; superfine also sold freely at \$5. The business was reported to be in part for speculation.

Wheat has been sctive and prices rather more steady, but with. out the slightest show of buoyancy of feeling. The export demand has been fully equal to the offerings, and that is the whole story. There was a very large business on Wednesday and Thursday, mainly at \$1 47@\$1 48 for No. 2 Chicago, \$1 50 for No. 2 Northwest, \$1 52 for No. 2 Milwankee, \$1 39@\$1 40 for No. 3 Spring, and \$1 57 for No. 1 Spring; also, No. 2 Milwaukee. for July, at \$1 4S@\$1 49, mostly at the lower price, with some No. 2 Chicago, for August, at \$1 45. There have been a few cargnes of white Canada sold at \$1 53@\$1 60, in bord, as in quality, but as a rule Winter wheats has been quiet. The receipts of wheat at the Western markets, as well as the Eastward movement thereof, continue on a liberal acale. To day there was a decline, with a dull market; No. 2 Milwaukee closed at \$1 50, after selling at \$1 501@\$1 51.

Indian corn has been greatly depressed, and the average of new Western mixed received by cansl has lost the improvement noted in our last. During Wednesday and Thursday large lines were closed out at 50@52c. for fair to good "steamer" condition, with heated and warm at 44@48 c. Strictly prime corn has become so scarce as to be difficult to quote. Receipts of corn at the Western markets have increased, notwithstanding the whole movement involves severe losses. But receipts and stocks are considerably smaller than last year at this date; but there are obstacles in the extreme rates ruling for ocean freights, the poor condition of the corn precluding storing, and the absence of most of the coastwise demand which were not then encountered-hence the depression. Last evening large lines of "steamer" in xed were closed out at 48@49., and to-day there was rather more steadiness, but little

Rye has declined, with sales of Western, 85@SSc. To day, at boat load of Milwaukee No. 2 sold at 86c.

Oats have declined, and several bout lands of No. 2 Chicago have sold in the past few days at 421@421c, mostly at the lower price. To-day, the market was depressed for mixed, with No. 3 Chicago at 42c, but white oats were firmer.

# The following are closing quotations: GRAIN

The movement in breadstuffs at this market has been as follows:

# GROCERIES.

FRIDAY EVENING, June 20, 1878.

The general demand in a jobbing way is not all that could be desired, but there is a fair business doing for this time of the year, and altogether the market may be considered in a fairly satisfactory position. Teas remain dull, but are no worse than when we last reported, and the easier rates for money have been favorable for holders. Coffee has been dull, but most grades are held with a fair degree of steadiness. Sugar has fluctuated somewhat, and closes nominally steady. Molasses is in limited inquiry, with a firm feeling prevailing in all grades. Fruits are dull and without general change.

#### TEA.

There have been no arrivals of tea since our last report, though one vessel the "Drogsum," has arrived at Montreal with a full cargo of different grades. Very fittle business has been done in any grade either from first or second hands. The easier rates for money have enabled holders to show a beider front, but with the present full stocks even the strengest importers are willing acliers at the current rates. There was a small offering at auction early in the week, but the prices realized did not affect the quoted range for lots through the regular channels which is without change. Japans and greens are selling moderately in lines and an occasional small invoice is taken out by jobbers, but the aggregate movement is very small. Oclongs are still neglected and the market is in no way improved from the unfavorable position previously noted. Quotations are unchanged, but the recorded prices for Oolongs must be considered neminal in the absence of business. The transactions in Invoices amount to 1,500 half chests Greens, 1,000 do. Japana, and 500 do. Qoolongs.

Imports at New York the past wack have included 1,466,132 lbs. black, per "Petersburg." from Amoy.
The fellowing table shows the imports of Tea into the United States from January 1 to date, in 1878 and 1872:

Atlantic ports, 1873...1bs. 12,690,590
Atlantic ports, 1872..... 11,946,793 Total. 88,540.801 82,199,845

The indirect receipts at New York, principally overland receipts from San Francisco, have been 49,424 pkgs. since January 1, against 77.198 last year. Imports at San Francisco from Jan. 1 to June 1, were 429,510 lbs. of Chins, 1,127,595 lbs. of Japan and 200 lbs. of Java tea.

#### COFFEE.

There has been a moderate business in Rio coffees, principally in the way of small involces to keep up stocks in second hands. With a reduced distributive inquiry, the sales of invoices very naturally fail off and for the next 30 days or more there is no reason to expect much activity. Nevertheless holders are generally steady, and foreign advices are reported as favorable for the importing interest. The present stock is deficient in the ordinary grades, which are very difficult to obtain. The advices by the "Merrimack," which arrived on Wednesday, are favorable and do not change the market, which closes quiet but steady at our last quotations. The stock of pale coffees continues very light, although small additions have been made to the supplies of Costa Rica and Savanilla grades. The vessels detained so long on the bar at Maracaibo have got off and considerable arrivals of that grade are looked for at an early day. These coffees have nearly all been sold to arrive, and will go directly into second hands. Their prospective arrival has created more disposition to sell the other pale grades, which are not so readily marketable when Maracaibos are to be had. The stocks are so small, however, that prices are fully maintained and previous quotations are repeated. Sales are: 1,500 bags Rio, ex "Ontario," 19c.; 502 do., ex "J. L. Pendergaat," 183(c.; 6,093 do., ex "R. A. Messer," 183(c.; 573 do., ex "South America;" 4,000 do., ex "Collega;" 528 do., ex "Merrimack;" 1,320 Santes, ex "Cito;" 2,136 mats Java, 1,819 bage Laguayra. 2,187 do. Porto Rico, 914 do. Costa Rica, 355 do. African, sold in lots for con-

Imports have included 5,627 baga Rio, per "Merrimack," 4,006 do. do., per "Minnet;" 4,165 do. Marscalbo, per "Victoria Perez;" 300 do. St. Domingo, per "Vicksburg," 25 do. do. per "Wiley Smith," and 4,134 do. aundries. The stock of Rio June 19, and the imports since Jan. 1, 1873, are as follows:

The market for raws has been rather quiet during the past week, the dull ness in refined having the effect of limiting the purchases of refiners, who are, many of them, working on half time. Holders of refining grades continue to manifest a fair degree of firmness on all but the lower gradee of Cuba, which have been slow of sale, and are off a fraction from our last quotations. Fair refining, and above, are steadily held, and remain at previous prices, though slow of sale at the close. The call for grocery grades has been limited, and the market is nominally steady at former quotations. There was a strong feeling in refined, with considerable activity just after our last report, but later the market dreoped, and at the close quotations are an eighth to a quarter off from our last. Grocers bought heavily of powdered some weeke sgo in anticipation of an active inquiry as is usual during the berry season, and an advance in prices. The demand has proved unusually light, however, and although better at the close, helders of pewdered find themselves overstocked with sugars, which are likely to prove a loss. The sales of raws include 3,337 hhds. Cabs. 7%@8%c.; 473 boxes do., 7@7%c.; 450 boxes clsyed, 8%@8%c.; 4,870 boxes Centrifugal, 8%@9%c.; 1,717 hbds. do., 8%@9c.; 368 hbds. Porto

Rico, 83/@93/c. Imports at New York and stock in first hands June 19, were as follows;

The requirements of the trade are small, and the sales of trade qualities continue upon a restricted scale. The arrivals of newcrop grocery from Porto Rico and the Euglish Islands have been lighter than usual thus far this year owing to the light crop, and the small stocks now in the hands of importers bere are held with a good deal of atcadiness, although there seems to be but little inquiry. The main activity during the past week has been in refining grades, for which there is a steady call, with some transactions in Muscavado at about last quotations. There is a moderate call for New Oricans, with sales chiefly of small lots at full former prices, and a slight advance is quoted on the choicest grades. The stock in first hands is reduced to 1,000 bbls., and as there is very little more to come forward to this market there is every probability that the stock will be cleared out early. The sales of syrups are light, and prices are chiefly nominal. The transactions in molasses reported since our last are 337 bbda, Porto Rico, 36c.; 155 do. in lots, 45@65c.; 400 hbds. Mns. covado, 30c.; 150 do. Cienfuegos, 31%c.; 591 do. Porto Rico, 379 do Trinidad, 400 do. do., and 400 Muscovado, on private terms; 350 do. clayed, 31c.: 550 Cuba, 30c.

The receipts at New York, and stock in first hands June 19, were as follows:

# THE DRY GOODS TRADE.

FRIDAY, P. M., June 20, 1873.

The dullness noted in our previous reports has been intensified by another week of summer weather, attended, as usual, by a pretty thorough exodus of people to the country and falling off in the retail demand for everything except strictly summer fabrics. Jobbers are in constant receipt of small orders from dealers in the interior who are in need of goods to replenish stocks, and the limited amounts moved by this means are effecting a gradual reduction of supplies, so that when the period for the semi-annual accounting of stock arrives-some two weeks hence-jobbers will find themselves with as few goods on hand as they could have expected. The latter part of the season with them has been marked by unreasonably low prices in many instances, the result of strong competition and of the practice so generally resorted to of cutting prices for the purpose of forcing sales. The current sales from first hands are very light, and the market is wholly devoid of interesting feature. Few alterations are made in prices in consequence of the utter absence of business, but quotations are to a great extent nominal, more particularly in cotton fabrics. Collections come forward with a fair degree of promptness, and the market is further benefitted by an easy money market.

DOMESTIC COTTON GOODS.—The sales of both brown and bleached cotton fabrics from second hands are restricted to a few of the more staple qualities, and these are only moved at irregular prices, and by concessions on the part of jobbers who are bending every effort to the reduction of their stocks before the season is entirely closed. Agents continue to hold their goods at about previous prices, but are not meeting with much encouragement from buyers, who are not only indisposed to operate at the moment, but regard the current prices on nearly all lines, a about the relative value of the raw material. It is probable that with the opening of the fall season there will be a decline in values, unless an improvement in the prices of raw cotton, which many look for, occurs in the meantime to support the presen basis. Few changes have occurred in prices during the past week, although an occasional reduction in our prices will be found. Colored cottons are dull and nominally unchanged There has been very little inquiry for prints excepting in polks spots and linen effects. The leading manufactories are about shutting down for the summer, and there is nothing to denote the probable tendency of prices at the opening of the fall trade Other cotton fabrics are dull, and without notable feature.

DOMESTIC WOOLEN GOODS .- The trade in woolen fabrics remains about as last noted. While there is no general luquiry for light weights, enough are selling to the tailoring trade to cause some further reduction of stocks, and the season will close with fine cassimeres in summer weights pretty well cleared out Heavy weights are selling fairly to clothiers, who are busily engaged on their fall stocks. Fine goods seem to be wanted principally, and the low and medium qualities are slow of sale. There is some call for overcoatings, the demand running mainly upon Chinchillas, which are already well sold up, though at prices rather favoring buyers. Moscows and beavers have not been taken with much freedom as yet, but are steady at prices which should induce buyers to operate freely. Other woolen fabrics are destitute of essential feature, in the absence of trade.

Foreign Goods.—While the reduced volume of imports con tinues favorable for the market, even the light arrivals are considerably in excess of what is required to supply the current consumptive wants of the trade, and with a continued dullness prices are irregular and decidedly in favor of buyers. Goods are still being returned to Europe, and if the exact figures were known the amount of re-exports would reduce considerably the figures of our imports for the year. At present there is some demand for Japanese and grenadines. Lawns, chambrays, percales and cretonnes were in fair request tor small lots, and the approaching exodus to the country and seaside has developed a better inquiry for linen suitings. Piques and organdies have been more sought for, but white goods generally were dull. There has been no change for the better in colored dress or millinery silks, and black gros grains have been quiet. Fine and medium grades of black mohairs and French cashmeres d'ecosse and draps d'ete have been iu moderate request, and are firm in price. Llama lace shawls and jackets continued in favor, and were freely distributed. No. 12 black gros grain ribbons, and few choice shades of the same width, have been quite active, but other bonnet widths have been quiet.

We annex a few particulars of isading articles of domestic manufacture our prices quoted being those of leading lobbers:

Advertisements, in either Journal, is, per line each insertion; if ordered for five or more insertions, a liberal discount is allowed.

The Publishers cannot be responsible for Remittances unless made by Drafts or Post-Office Money Orders.

To A near file for holding current numbers of the Chronicle is sold at the office for 50 cents, postage on the same is 20 cents. Volumes bound for subscribers at \$150. The first and second volumes of the Chronicle are wanted by the multishers. by the publishers.

# GOVERNMENT BONDS AND SPEC!E EXPORTS.

Two suggestive changes have made themselves rather conspicuous during the past week, one the increasing strength of government bonds, the other the sudden recuperation of gold, one sign of which appears in the fact that the bullion shipments are rather larger, and the Treasury offer of 11 millions of gold on Thursday was met by bids to the amount of 15 n.illions, the whole amount offered being allotted at the highest price bid.

As to the gold movement it would have been probably more severe but for the recent arrangements with the Bank of France for the payment of the German indemnity. These arrangements are now known to involve the advance of 200 millions of francs by the bank, 150 millions in gold, and 50 millions in notes or gold at the choice of the government. The announcement has had a stimulating effect on our market for Government bonds, because it fore-

tokens the early return of ease to the money market of Europe; but it has slightly disturbed the sensitive quotations for gold and foreign exchange, because, although the financial condition of the continent is certain to be relieved next September of the incubas of the French indemnity, which is then to be all paid up, still the interval may perhaps witness considerable perturbation. On the details of the transaction the Paris correspondent of the Economist gives the following account:

The Treasury will reimburse this sum in bank notes, in five monthly payments, from December, 1873, to April, 1874, and will appropriate for those payments the instalments to be received on appropriate for those payments the installments to be received on the loan of three milliards, during the same months, to the amount of 300 millions, which sum will form the guarantee of the advances of 200 millions; should the Treasury, in consequence of anticipated payments, have in the month of December next a lesser sum than 300 millions to receive on the loan, the difference must be deposited at the Back. The Back will receive interest at the rate of one per cent per annum for the amount of the advances. The profits of the Back on this transaction will exceed a million of fraces; the sale of the gold on the market would have a larger sum even at the present would, however, have produced a larger sum even at the present low premium. The intention of M. Thiers had been to take the sum half in gold and half in notes, in ord r not to weaken too much the Bank reserve of specie, and create the risk of a depreciation of the currency. That system, however, presented certain inconveniences, for the 100 millions of notes must have been exchanged for bills on foreign countries, another 100 millions of which would have been required. The Bank had besides more need to save its notes than its gold. It had \$20 millions of specie to a circulation of 2,800 millions, equal to 29½ per cent, while in the first week of January, 1872, the proportion had been only 620 millions to 2,400 millions of paper, or only 25½ per cent. The Bank, therefore, considered that if its notes in January, 1872, preserved their nominal value with a reserve of 25½ per cent, the v would not lose their credit if the proportion of metal were reduced, temporarily, to 22½ per cent, and the more so that the political situation has since improved, and the Bank can count on recovering a con-iderable portion of the specie before the end of the year. The margin would, however, have produced a larger sum even at the present low premium. The intention of M. Thiers had been to take the The issue is limited to 3,200 millions, and the circulation last week amounted to 2,811 millions, leaving a sum of 389 mil ions only disposable; on the other hand, the Treasury last a right to draw a further sum of 45 millions on account of the 1,530 millions, at which the maximum of advences was fixed. The Bank has at which the maximum of advances was fixed. The Bank has engaged to make advances of 120 millions to the railway companies, 30 millions to the Credit Foncier, and 60 millions to the City of Paris, leaving only 164 millions for the Treasury and private deposits, together (last week) 315 millions, and to meet any increased demands for discount.

Several interesting questions are suggested by these state ments touching the future movements of the Bink of France, Its cash reserves of 820 million francs will be reduced to 600 millions, or \$120,000,000. It will be instructive to watch the gold premium, and see to what extent it is raised by this loss of gold reserve. The bank notes outstanding amount to 2,807 million francs, and the coin reserve held against this circulation was 820 millions on the 31 June, the day of this agreement. When its stipulations are fully carried out, the coin reserve will be depleted 25 per cont, as we have said, and it remains to be seen whether this impairment of the reserve will give any upward impulse to the premium on gold. It may also happen that in the carrying out of the arrangements of the bank with the govern-

ment, the currency may be further enlarged. If so, there will be another cause of possible inflation, the indications of which are well worth watching. At present, however, we are concerned rather with the more practical results which affect our own markets.

The first of these is the rise of Government bonds. These bonds are scarce, and are now selling at about the same price as when gold was 118. The theory scems to gain ground that immediately after the completion of the indemnity settlements there will be such a vast body of idle capital seeking investment in European money markets, that Five-Twenty bonds will have a very free sale. Consequently shrewd speculators and bankers abroad are buying the bonds and laying them aside till the expected demand springs up. It is confirmatory of this view of the case that the financial news from Amsterdam, Frankfort and Berlin is better. In Vienna, also, it is said that the Bank of Austria is about to enlarge the list of securities on which it lends as collateral. Some of the soundest bonds are arbitrarily excluded from that list, and consequently there is no market for them in panicky times. The latest failures are socied to have been thus caused. The defaulting firms had plenty o.c assets such as they were; but these assets were not cash. They were good securities; but the bank would not lend on them; unnd there were no purchasers. Hence they had no alternative cont to succumb. The proposed extension of banking facilities, if made will require to be very carefully guarded. In Austria, however, and in her money markets, we have little interest, as our securities are not extensively held there; nor indeed do we look so much to any German markets as formerly; but as these fall off, the new demand from England, Scotland and Holland more than make up the deficiency.

As to the export of gold there is such a demand in Germany for specie that we may have to make some continued shipments. The German government is coining \$3,000,000 a week, and the total of their coinage on the 24th of May was 663,258,450 marks or \$165,814,610. The French government will pay Germany in gold \$10,000,000 a month. Hence to supply her mints and keep them running Germany will only require to get during the next four months \$2,000,000 per month more than she receives from France. And these two millions in all probability will be got from recoinage. If this expectation prove correct there will not be so much demand for Germany as there has been. But even in that case there may still be an export movement of gold from us; for the Bank of England holds but 11 millions of reserve in its banking department; and the surplus export of gold from Great Britain after deducting the imports in the first five months of 1873 was £3,164,351 against £2,282,830 in 1872; the total gold exports being £ 10,117,077 in 1873 against £7,571,941 in 1872, and 4,796,120 in 1871. Our production of the precious metals, however, is so ample that whatever the be probable export of coin we can easily spare all that Europe at present is at all likely to want frem us.

# THE FALLING OFF IN OUR IMPORTATIONS.

We are gratified with the practical interest awakened by the special tables of commerce which we published last week. A further instalment of the official figures showing the course of our import and export trade is given on another page. Just now these facts are carefully watched, and have extreme importance in many points of view. Some of the more obvious lessons they teach were discussed by us lately. But there are a multitude of others forcing

that our imports are decreasing is by some persons regret ted. The decrease is certainly diminishing the gold revenue of the Government, and is in other respects playing an important role in our finance. The aggregate duties received at New York for the first eleven months of the fiscal year were 118 millions, against 140 millions last year and 131 millions in 1871. The effects of this falling off in the revenue will be of course to add another to the causes which are curtailing the surplus applicable to redemption of the public debt. The repeal of numerous import duties has already lessened this surplus considerably, and now the diminution of importations will contract it still more.

It appears, however, that this new movement of our foreign commerce only began three months ago. In April and May our importations were 71 millions, against 88 millions in 1872, and 69 millions in 1871. Later we had a still further falling off, which is expected to continue during the whole of the Summer and Autumn. The annual tables of foreign imports, when made up for the fiscal year, ending July 1, will not consequently reflect more than the first three months of this new movement, as may be seen from the official figures for the first, eleven months which show the New York importations of merchandise at 384 millions for 1873, 382 millions for 1872, and 318 millions for 1871. There was an increase in the first eight months, and a falling off for the rest of the year. The extent to which this curtailment of imports will be carried is uncertain, but its effects will obviously be to prevent further tax repear of present, and to neutralize most of the elasticity of the customs - evenue, which had in some quarters been relied upon to meet the Treasury disbursements of the

On the other hand a second-consequence will be to lessen the probability of commercial det ression during the critical months which are immediately before us. The smaller the aggregate importation of foreign goods, the less burdened will our money market be with the task of carrying them.

One of the most gratifying changes of recent op inion in commercial circles is that regarding the probable course of business for the rest of the season. For several successive years, as is well known, our fall trade has been checked a by a variety of circumstances. Prominent among these troubles is the stringency of the money market, which has givown worse year by year, till it has culminated in the long unprecedented period of violent stringency which has just ended. Arguing from the past, many persons are anticipating that as last fall was worse than that of 1871, and as 1871 was much worse than 1870, so 1873 again will 1871 surpass both, and we may expect next fall more sever e spasms in the money market, higher rates for loans, greate: troubles for industrial and commercial enterprise, and more general depression in business movements.

But this gloomy anticipation is becoming less prevalent than during the pressure of the last few months. In propo tion as the money market grows easier the spirits of of mercantile classes revive, and now the general opinion lis much less than formerly inclined to look for business troubles next autumn. One chief reason for this return confidence is the long prevalent belief which is now ful ty ripened into certainty that our importations, heretoforce excessive, are now falling within safer limits, and will co tinue a wholesome contraction of volume.

In the statistical returns for June we shall, no doub, have a complete confirmation of the evidence which meets is wherever we turn and proves the vigorous caution with which our merchants are contracting their business. The teachings of the past nine months have not been lost up on themselves on the public attention. The suggestive fact them. It is evident that they are carrying smaller stocks of

goods, and of course it follows that smaller loans will be required by them and less accommodation from the banks. The pressure from this source on the loan market will therefore be relaxed, and it this general conserva ism and prudence shall go on and become sufficiently extensive it is easy to see that a powerful force will be brought into play to prevent the stringency which has been feared.

These then are two of the lessons suggested by the falling off of our importations. It will diminish the gold revenues of the Treasury, and this may cause temporary inconvenience. But on the other hand it will relieve the monetary mechanism of the country from some of the pressure which might otherwise incommode us in the fall, and might exaggerate and develop any degree of stringency which may then prevail.

Taken in connection with the rapid increase of our merchandise exports, which at New York amounted to 245 millions the first eleven months of 1873 against 205 millions in 1872, and 204 millions in 1871, this diminution of our imports has an obvious relation to our foreign balance of trade, and is tending with our exports of securities to diminish the burden of our indebtedness abroad, so that our eredit will be improved, and foreign eapital will be more likely to flow this way a few months hence, when we need it, and when our monetary activity may render us very dependent upon such exterior supplies. Su h streams of floating capital are expected to be thus attracted hither more freely from abroad, in consequence of this contraction now going on in the importation of drygoods and other commodities. If this expectation be fulfilled we shall have another illustration of the compensations which make up for the real or supposed inconvenience of this temporary curtail ment of our trade; and in any case we have abundant reason to desire that it may continue for some time to come. The causes which have started this contraction of imports are salutary in their nature, and though slow in their operation, they are exerting a healthful, diffused influence in several departments of our industrial and commercial life.

### CHICAGO, ROCK ISLAND & PACIFIC RAILROAD.

(Returns for the Fiscal Year ended March 31, 1873.)

(Returns for the Fiscal Year ended March 31, 1873.)

This railroad is a consolidation, under date of August 20th, 1866, of the Chicago & Reck Island Railroad, in Illinois, and Chicago, Rock Island & Pacific, lato Mississippi & Missouri Railroad, in Iowa. With a view to vest in the Rock Island Company the ultimate and legal possession of the roads, lands and other interests, owned by the Mississippi & Missouri Company, an agreement was entered into November 1, 1865, between the Chicago & Rock Island and the Mississippi & Missouri Railroad Companies, by which the former became the agent of the latter, to operate and manage their property. To carry out the plan agreed upon, a company was organized under the laws of lowa (the Chicago, Rock Island & Pacific Railroad Company), with power to purchase the property and complete the construction of the road. Under a decree of foreclosure of all mortgages, on the 9th of July, 1866, the entire railroad, franchises, lands and all other property of the Mississippi & Missouri Railroad were sold, and at such sale the new company of lowa became the purchasers; and on the 20th of August, 1866, the stock and property of both the Chicago & Rock Island of Illinois, and the Chicago, Rock Island & Pacific of Iowa were merged and consolidated into the present corporation, by the name of the Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chicago, Rock Island & Pacific Palikad Chica present corporation, by the name of the Chicago, Rock Island & Pacific Railroad Company, the capital of which was fixed at the aggregage amount which the companies respectively were author aggregage amount which the companies respectively were author ized to create and issue, but the total issue of consolidated stock at the time the company should go into operation was limited to \$9,200,000. The line in Iowa, from Davenport to the Misseuri River, and from Wilton to Oskaloosa, a total of 432½ miles, received a grant of land of 6 sections, or 3,840 acres per mile of road constructed under act of Congress of May 15, 1856, and that part of the line from Kellogg to Des Moines, about 43 miles, received an additional grant of 4 sections, or 2,560 acres, under act of June 2, 1864. These grants became the property of the consolidated company. The average length of road operated by the Chicago & Rock Island, before consolidation, including the Peoria & Bureau Valley, was 228 miles. In 1866-67 the average length of the consolidated line was 340 miles; in 1867-68 it was 425 miles; in 1868 69 it was 520 miles; in 1869-70 it was 590 miles, and in 1871-72 611 miles, while the past year the average was 660 miles. This Company have also a lease of the Chicago & South Western Railroad (Wasbington, Ia., to Leavenworth, Kan.), 250 miles, but the accounts are kept separate.

sive years since the consolldation show that the value of the property has been steadily enhanced by the substitution of additional steel rails in place of iron, permanent masonry and iron bridges for wooden structures, increased side tracks and depot bridges for wooden structures, increased side tracks and depot facilities and a general improvement in the permanency and smoothness of the road-bed and track. During the past year there has been a large increase in the number of passengers carried, and while the average distance and rate per mile were less, still the increase in earnings from this source was over 9 per cent. The freight movement also shows an increase of 26.87 per cent. over last year, but the earnings on account of same only show an increase of 9.25 per cent, proving that the company is annually increasing the amount done, but decreasing the rate of compensation. If the rates of five years ago could have been maintained, the earnings from freight alone would have been increased nearly 50 per cent. The additions made to the equipment of the line have been as follows: 14 first-class locomotives, 4 passenger coaches, 2 baggage cars, 6 drovers' cars, 5 caboose cars, 50 box freight cars, 129 stock cars, 50 platferm cars. The Westinghouse Air Brake has been applied to 36 locomotives and 76 cars.

to 36 locomotives and 76 cars.

Daring the year improvements of a permanent character have also oeen made. Prominent among them are the new depots of brick at Rock Island, Davenport and Iowa City. Considerable progress has also been made in supplying stone ballast for track, the scarcity of suitable sand, for that purpose in Iowa rendering the use of broken stone in many places almost indispensable. The new bridge across the Mississippl River at Rock Island built under direction of the United States Government, but owned in part by this company, was brought into general use in October last, effecting considerable saving in time and expense of crossing trains. The branch railroads, extending to Winterset and Sigourney, have been completed and in operation since May last, and are proving valuable feeders for the main line. Grading for second track between Port Byron Junction and Colona is in progress, and it is contemplated that about twenty miles of second track will be brought into use the present season. Arrangementa Lave been entered into with responsible parties to construct, arch colverts and bridge abutments at several points, where wooden structures require renewing, and contracts made for steel rails, safficient to require renewing, and contracts made for steel rails, sufficient to lay fifty miles of track. The company have now in use 75.79 tons of Bessemer steel rails, and 348 tons of steel-capped rails, equivalent to 86 miles of track. A portion of the steel rails on this road have now been in use 61 years and give no indication of failure. The Land Commissioner reports sales of 15,592 acres, realizing the sum of \$126,779, averaging \$8 40 per acre, except for a hundred acres of doubtful title that were quit-claimed.

# CURRENT TOPICS.

STATISTICS OF COMMERCE AND NAVIGATION .- Monthly Report No. 8 of the Bureau of Statistics is in press, and contains the following statistics:

| Periods.                         | Imports.     | Domestic exports, (specie values) | Foreign exports. |
|----------------------------------|--------------|-----------------------------------|------------------|
| Month ended Feb. 28, 1873        | \$55,118,562 | \$51,830,696                      | \$1,510,003      |
| Month ended Feb. 28, 1872        | 52,911,647   | 46,458,007                        | 1,709,493        |
| Eight months ended Feb. 28, 1873 | 434,291,063  | 384,136,953                       | 17,780,900       |
| Eight months ended Feb. 28, 1872 | 891,846,515  | 320,477,771                       | 14,803,379       |

Of the total value of the imports and exports for the eight months ended February 28, 1873, and February 29, 1872, the fel lowing amounts consisted of specie and bullion, and of merchandise, respectively;

|                          |              | Domestic exports. |               |
|--------------------------|--------------|-------------------|---------------|
|                          | Imports.     | (specie raines.)  | fer'n exp'ts: |
| Specie and bullion, 1873 | \$15 371,491 | \$56,538,591      | \$7,442,019   |
| Merchandise, 1873        |              |                   | 10.338,881    |
| Specie and bullion, 1872 | 7,811,485    |                   | 5.019,295     |
| Merchandise, 1872        | 384,035,030  | 290,113,259       | 9,754,684     |
|                          |              |                   |               |

The total value of foreign commodities remaining in the warehouses of the United States February 28, 1873, was \$66,693,532, as compared with \$72,736,374, February 29, 1872.

Allowing for the difference in the warehouse account, the imports exceeded the exports, domestic and foreign combined, for the eight months ended February 28, 1873, by \$38,416,052, while for the eight months ended February 29, 1872, the excess of imports over experts was \$34,386,533.

The amounts carried in American and foreign vessels respect. ively during the eight months were as follows:

|                        |               | Domestic exports, | Foreign     |
|------------------------|---------------|-------------------|-------------|
|                        | Imports.      | (mixed values.)   | exports.    |
| American vessels, 1873 | \$104,591,248 | \$108,246,698     | \$5,147,805 |
| Foreign vessels, 1873  | 317,043,190   | 311,816,048       | 10,939,300  |
| Land vehicles, 1873    | 12,056,325    | 5,282,949         | 1.693,795   |
| American vessels, 1872 |               | 101,734,331       | 4,420,853   |
| Foreign vessels, 1872  | 279,827,533   | 245,554,591       | 8,559,935   |
| Land vehicles, 1872    |               | 4,834,193         | 1,822,591   |

Number and tonnage of American and foreign vessels engaged in the foreign trade which entered and cleared during the twelve months ended February 1873 and 1872 respectively:

| 1 |                              | Entered.  | Cle    | eared     |
|---|------------------------------|-----------|--------|-----------|
| ı | No                           | Tons.     | No.    | Tons.     |

### [From our own correspondent.]

LONDON, Saturday, June 14, 1873.

The Directors of the Bank of England have this week elected to return to 6 per cent, so that the seven per cent minimum rate of discount has had a very brief career. It may, nevertheless, be asserted that the Bank have in both cases acted with prudence, and that the course they have pursued was unavoidable. Last week's return, as you will have perceived, was a most unsatisfactory one, for the proportion of reserve to liabilities had fallen to 314 per cent. The Directors were, therefore, quite justified in advancing their minimum to 7 per cent. But this week the weekly return is as favorable as the last one was adverse, and the proportion has been augmented to 36 per cent. It follows, there. fore, that the Directors were compelled to reduce their rate, more especially as their business had already declined considerably while

s. d. s. d

there would have been the certain prospect of a further important diminution. The decrease in the amount of other securities is as much as £1,743,905. The return shows an increase in the reserve of £1,221,462; the decrease in the circulation of notes having been £839,281, while the supply of bultion has been augmented by £421,402. There has, therefore, been a return of coin from internal circulation, as the amount sent into the Bank on balance from external sources during the week was only £241,000.

An important question arises, and has been under discussion this week, viz.: What has led to the improvement in the Bank's position? that is to say, was it the 6 per cent or the 7 per cent rate which caused it? Many will, of course, say that it resulted from both, and the remark is undoubtedly true, but amongst the well informed the opinion is very general that the 6 per cent rate would, after all, have sufficed. We have this week imported a large amount of the precious metals, and as much as £1,250,000 has been imported in sovereigns and gold from Australia, South America and Egypt. Now it is quite clear that even as regards Egypt, the country nearest to us, the advance to 7 per cent on Weduesday, the 4th instant, could not have brought gold to Southampton in the course of one week. That being clear with regard to Egypt, the question as to South America is at once solved, and we must therefore fall back upon our assertion that so far as external supplies are concerned, 6 per cent is at the moment as efficacious as 7 per cent, and has proved so. It has had the effect of attracting gold from distant quarters, and as we are quite on a par with the French and German markets, while our credit is as good as ever it was, there can be no motive in raising the rates of discount to a point which would do injury rather than good But in spite of the favorable turn which matters have taken in the financial world, we repeat that the Bank Directors cannot be blamed for the course they have pursued. Last week their position was so greatly weakened as to cause anxiety; but the effect of 7 per cent on the English and German money markets, and of 6 per cent on more distant quarters has been excellent, and has led to a rapid recovery. It is quite possible, and we believe that it would have been so, that 6 per cent, had it had a few days' longer trial, would have been sufficient; but in times like these it is desirable to act promptly, and the Bank anthorities have done so, both in raising their minimum to 7 per cent and retiring to 6 per cent at the earliest possible moment. It is necessary, however, to add that though the Directors are credited with prudence in their recent movements, most persons are of opinion that 7 per cent would not have been necessary had they acted with more promptitude some weeks since, when they and the public perceived that there would be a considerable strain upon their resources, and that there was not an adequate reserve to meet it.

The demand for money since the Bank rate was reduced has been very moderate, and the rates of discount are easy, as follows:

| Per cent. I                | Per cent.                         |

^{*} Prices June 5.

The foreign exchanges have been more favorable to this country, and the Italian exchange, which was last week much more favorable to Italy, has experienced a decided reaction. Gold continues in demand for export to Germany, and all arrivals of bars are purchased for that purpose. Silver is rather cheaper, but the price of Mexican dollars has not materially changed. The following prices of bullion are from the circular of Messrs. Pixley, Abell, Langley & Blake:

| Bar Gold per oz. standard, last price,                            | 77 9%@          |
|-------------------------------------------------------------------|-----------------|
| Bar Gold, fineper oz standard, do.                                | 77 934 36       |
| Bar Gold, Refinable per oz. standard, do.                         | 77 11% 76       |

OOLD.

The stock markets have been firm, and the tendency of prices has been, in a carly all cases, tavorable. Spanish atock forms the principal exception, as may well be expected, considering the disordered state of the finances and of the country. United States Government securities have been in demand, and been purchased steadily for investment on London as well as provincial account; while Erie shares and Atlantic & Great Western securities have attracted considerable attention, and have realized higher prices. Illinois Central railway shares, however, are dull, and have receded in prices.

One of the leading features in the stock exchange this week has been the strong and influential demand for telegraph securities. The advancee in prices has been general, and additional firmness has been given to the market by operators for the fall, closing their accounts. Telegraph Construction and Maintenance shares have been in strong request, and are now quoted at 34\frac{a}{2}\$ to 34\frac{a}{2}\$. West India and Panama ordinary and ten per cent. preference shares have also attracted considerable attention, and have experienced a marked improvement. The repair of the cable, and the belief that as soon as the line to Colon is completed, the compacy will secure a large and remunerative traffic with the west coast of South America. The securities of the Atlantic Telegraph Companies have been in demand, and are also higher in price. The following were the closing quotations this afternoon

| Anglo-American | Panamas | 7%@ 8<br>%@ipr. |
|----------------|---------|-----------------|
|----------------|---------|-----------------|

The weather has been very fine for the growing crops, and from the principal agricultural districts favorable but not glowing reports have been received. In early districts the wheat is now forming into ear, but the crop is by no means generally in so forward a state. The harvest still promises to be late, but with a continuance of such weather as we are now enjoying it will not be so much behindhand as heretofore anticipated. The trade for cereal produce during the week has been slow, and for foreign wheat is, per quarter less money has been accepted. The supplies of Eoglish wheat offering are now very small. The foreign markets reported firm, Paris, Rotterdam & Dantzic being decidedly dearer, owing to the scanty supplies of produce on offer.

The following figures show the imports and exports of cereal produce into and from the United Kingdom since harvest, viz.: from September 1 to the close of last week, compared with the corresponding periods in the three previous years:

|             | IMPORT     | rs.        |            |            |

—Messrs. Robinson, Chase & Co., bankers, 18 Broad street, are offering to investors a choice security in the City of Rochester 7 per cent gold bonds. They run thirty years, interest is payable January and July, and they can be had at par until July 1st, after which interest will be added. The bonds are authorized by act of the Legislature, April 27, 1872. This loan should not be confounded with the Rochester Water Works bonds, which were offered here some months, since but were in no sense an oblige. offered here some months since, but were in no sense an obliga-tion of the city, having been issued by a private company, which has since suspended operations. Rochester has now determined to build and own its water works, and the above-mentioned loan is issued for the pupose of construction, &c. The city has over 75,000 inhabitants, with a real estate valuation of over \$70,000,000, which is assessed for but \$14,000,000. Its total indebtedness, exclusive of this loan, is but \$1,838,400.

-Mr. E. N. Erickson, favorably known in commercial and financial circles in connection with the advertising agency of phasical circles in connection with the advertising agency of Peaslee & Co., has recently become the managing partner of that firm. Mr. Erickson's extensive experience with this house for the past ten years, during which time he assisted in placing some of the heavy advertising contracts for the United States Government loans, Pacific Railroad bonds, and other large financial transactions, eminently qualifies him for his present responsible position; while his thorough familiarity with the business in all its details, and his well-known promptness in dispatching it will be beneficial to both advertisers and publishers.

—The semi-annual interest due on the Toledo, Canada Southern and Detroit Railway Company's first mortgage bonds will be paid by the Union Trust Company. The interest coupons, due July 1, of the first mortgage bonds of the Canada Southern Railway Company will also be paid at the Union Trust Company's office. The interest on the sterling bonds will be paid at the London Bank of Company Commerce.

-The First National Bank is about to remove July 1 to its new office, 94 Broadway, and announces an increase in its surplus to \$500,000, thus making its working capital \$1,000,000.

The July interest on Central Pacific Railroad, Western Pacific and California and Oregon first mortgage bonds will be paid on the 1st prox. by Messrs. Fisk & Hatch, No. 5 Nassau street. The July interest on Chesapeake and Ohio 7 per cents also paid by the samo firm.

—The interest on the first mortgage bonds of the Northern Pacific Railroad Company, and on the first mortgage bonds of the Lake Superior and Mississippi Railroad Company, both due July 1, will be paid on and alter that date by Messrs. Jay Cooke & Co.

#### BANKING AND FINANCIAL.

### BANKING HOUSE OF FISK & HATCH,

5 NASSAU STREET.

NEW York, June 24, 1873.

We recommend to our friends and customers for investment of surplus Capital, or in exchange for Government Bonds,

THE CHESAPEAKE AND OHIO SEVEN PER CENT GOLD BONDS; principal and interest payable in gold in New York City; interest payable January 1 and July 1; bonds of \$1,000 each, Coupon or Registered. Price 90 and accrued interest.

THE CHESAPEAKE AND OHIO RAILROAD, A GREAT EAST AND WEST TRUNK LINE, 420 miles in length, extending from Atlantic tidewater at Richmond to Huntington, the most favorable point of railroad connection with the Ohio River, is completed, and doing a large, profitable and rapidly increasing husiness.

ITS TRAFFIC in the transportation of Agricultural Products and general merchandise between the West and the Eastern and South Atlantic States, and in the development of the immense Iron, Coal and Timber resources of the Alleghanies and the great Kanawha Valley, is growing as rapidly as it cau be organized.

ITS PASSENGER TRAVEL between the East and West and Southwest, and to the White Sulphur and other celebrated medicinal Springs on its route, is large and rapidly increasing.

ITS EARNINGS during the current year will be much larger than has heretofore been anticipated, and will largely increase from year to year.

NONE OF THE OTHER great East and West Trunk Lines and Coal and Iron thoroughfares, whose revenues are now so enormous, commenced their business with anything like the assurance of traffic which has greeted the opening of the Chesa. peake and Ohio, and its growth promises to equal in magnitude and excel in rapidity that of the most successful of its predecessors.

These facts, together with the thorough uction and substantial character of the Road itself, and the great value of the Company's property and franchises, enable us to recommend their securities with the utmost confidence.

Pamphlets containing full information concerning the Road and the country it traverses will be furnished on application.

We continue to deal in Government Securities, CENTRAL PACIFIC, WESTERN PACIFIC, and CHESAPEAKE AND OHIO SIX PER CENT BONDS, buy and sell Stocks and Bonds at the Stock Exchange on commission, for cash, make Collections receive Deposits, on which we allow interest at the rate of 4 per cent, and do a general Banking business.

FISK & HATCH.

### TO INVESTORS.

THE NORTHERN PACIFIC RAILROAD COMPANY having determined to close its 7-30 First Mortgage Gold Loan and thereafter to pay no higher rate of interest than 6 per cent. on further issues of its bonds, the limited remainder of the 7 3-10 loan is now being disposed of through the usual agencies.

This affords a desirable opportunity to persons wishing to reinvest July interest or dividends.

The Company now has more than 500 miles of its road built and in operation, including the entire Eastern Division connecting Lake Superior and the navigation of the Missouri River; the work of construction is progressing satisfactorily; the Company has earned title to nearly teu million acres of its land grant, and sales of lands have thus far averaged \$5 66 per acra.,

All marketable securities are received in exchange for Northern Pacifics.

> JAY COOKE & CO., No. 20 Wall street, New York.

# BANKING HOUSE OF HENRY CLEWS & Co., 32 Wall street, N. Y.

Deposit accounts of Mercantile firms and Individuals received all facilities and accommodations granted usual with City Banks; in addition thereto 4 per cent interest allowed on all daily balances

FRIDAY, June 27, 1873-6 P. M.

The Money Market and Financial Situation .- The financial markets during the past week have been destitute of any exciting feature; in fact, there has hardly been a week since

the beginning of the present year, when the absence of all notable movements in financial affairs was so generally observed. The excess of reserves in our city banks above the 25 per cent of liabilities, continues to show an increase, and the call !oan market remains very easy at an average quotation of 4 per cent, the range in rates being 3@5 per cent. In the discount market rates for commercial paper are lower on first class names at short dates, and we have heard of the sale of some choice paper with less than 60 days to run, below 6 per cent; this, however, is exceptional, and 61/07 per cent is a fair quotation for prime 69 day paper. The banks are purchasing paper more freely than heretofore, but there is a general aversion to taking anything which runs beyond the middle of September. Advices from London have been faverable, and the Bank of England reports a gain this week of £419,000, the discount rate remaining unchanged at 6 per cent, and discounts in the open market being about 1 per cent lower. In regard to the bullion movement it is stated that the extraordinary demand for re-coinage purposes in Prussia has raised the price of gold in London, and that this circumstance may facilitate the flow of the precious metal from this country to England. The bank of France gains this week 2,250,000 francs

The last weekly Clearing-house statement of New York city banks, rendered June 21, showed an increase of \$195,225 in the excess of reserves above the legal requirement, the whole of such excess being \$12,166,375. The total liabilities stood at \$247,744,

500, and the total reserves at \$74,102,500.

The following table shows the changes from previous week and a comparison with 1872 and 1871:

| ,              | 1873          |               |                   |               |               |  |  |  |

United States Bonds .- Government bonds have been steady on a small business. The situation of affairs remains very much the same as reported last week; foreign buyers are unable to take hold because the relative prices new at Lendon and New York furnish no inducement to purchase. It is possible that the July payments may stimulate the demand to some extent, and it by foreign holders will be re-invested in Governments. For private investors in this country prices are so high as to make these bonds compare unfavorably with railroad securities.

Closing prices daily have been as follows:

State and Railroad Honds, -Southern State bonds have been without any noteworthy feature, and transactions have been very limited. There is an occasional demand for Virginia bonds by parties residing within the State, who find them valuable on account of the possibility of using the coupons in payment of State taxes. There is still some interest in the proposed suit by North Carolina special tax bondholders to compel the payment of interest en their bonds, in pursuance of the favorable opinion of Mr. Reverdy Johnson; whatever the result may be in this case it is certainly true that in financial circles many are already inclined to entertain the views of Mr. Johnson, in thinking it a misfortune that any amendment to the United States Constitution should ever have been passed, which can be so interpreted as to protect States or any other parties in the non-payment of their legal obligations. Railroad bonds show only a moderate activity, though a better business both in old and new bonds is confidently expected after the first week of July,

Rock I-ld 1st 1s... 10.7 106 106 106 106 106 106 106 106 106 Inc. 1007 Jan. 6 108% June II Hallroad and Miscellaneous Stocks,—In the stock market business has been so dull as to occasion general comment. This is attributed in some degree to the death of Mr. Horace F Clark, who was president of two of the leading railroad companies, and was most deeply interested in Wall street operations. The place of Mr. Clark at the head of the respective companies has not yet been permanently supplied, though as to the Union Pacific Mr John Duff has been appointed acting president, and Oliver Ames and Elisha Atkira chosen to fill the vacancies in the executive committee, caused by the death of Oak's Ances and Horace F. Clark. The Pacific Mail directors of Oak's Amea and Horace F. Clark. The Pacific Mail directors, it is stated to day, have authorized the issue of \$6.000,000 bonds, but their counsel decides against the legality of such an issue. The report of the Chicago & Rock Island Railroad, just issued, is analyzed at some length on another page, and statistics of previous years' operations crought forward for comparison.

The daily highest and lowest prices have been as follows:

The Gold Market.—More interest has been shown this week in the gold market; in the early purt the price was depressed to 115 by the announcement that the Treasury would commence on 115 by the announcement that the Treasury would commence on Weinesday the prepayment of the July gold interest without rebets, the amount payable at this time being about \$25,000,000. Subsequently there was a recovery, and after touching 115\frac{7}{4}\text{ the price closes firm to-day at 115\frac{1}{4}\text{@115\frac{1}{4}}\text{. There has been more activity during the past few days, and there are some evidences that the clique is operating, particularly as shown in the large amount of bids, \$15.963,000, at the Treasury sale on Thursday, and, as some believe, in the exports of gold, which they allege have been made for effect. The principal points for the market now are to ascertain the Treasury programme for July and the extent of the export during two coming months. The rates to-day on gold loans were 2, 2\frac{1}{2}\tau1\$ and 3 per cent for carrying and flat for borrowing. The export of gold has been about \$500,000, with engagements of \$750,000 reported for to-morrow; the export of silver about \$470,000, and \$400,000 more reported for to-morrow. At the Treasury sale of \$1,500,000 on Thursday bids amounted to \$15,963,000. Customs receipts of the gold premium the following table will show the sourse of the gold premium

The following table will show the source of the gold premium each day of the past week:

STATE, CITY AND CORPORATION FINANCES.

STATE SECURITIES, CITY SECURITIES, HEALKOAD STOCK AND HOND LIST.

Entered according to Act of Congress, la the year 1873, by William B. Dana & Co., in the office of the Libraria of Congress, Washington, D.C.; University of the near approach of the "July disburse ments," which place a large amount of surplus funds in the hands of investors, and naturally stimulate the demand for good seemities. It is ostimated that the total paymonts of interest and dividends in the three cities of New York, Boston and Phila during the month of July approximate the large sum of \$100,000,000, and a fair proportion of this amount comes on the market for reinvestment. In this connection it may be well to direct the attention of the readers of the Chironicle to the advertisements of several prominent railroad loans which are now published in its columns, and also to refer to the equent table of such loans which was published May 24 on page 692.

In regard to the disbursements in Boston Mr. Joseph G. Martin, stock broker, No. 10 State street, in that city, issues a complete to the page and property of the street, in that city, issues a complete to the control of the Libraria of Congress, lint by year 553 by Ws. B. Dana & Co., in the office of the Libraria of Congress, which to direct the Libraria of Congress, which was particular to the disbursements in Boston Mr. Joseph G. Martin, stock broker, No. 10 State street, in that city, issues a complete to the congress of the Chironic of the congress, in the year 553 by Ws. B. Dana & Co., in the office of the Libraria of Congress, Washington, D.C.]

list of the several corporations paying in Boston, together with the amounts of stock or bonds outstanding and the rate per cent paid by each. We quote some of his remarks which are of general interest:
